---

Experienced in automating onboarding processes, focusing on data migration. A great team player and self-starter. Willing to work on traditional scrum teams and individually. Seeking a role where I can continue to learn and grow as an individual contributor and team leader. In my free time, I enjoy giving back to the community by educating, planting, and cleaning up green spaces around Atlanta through Trees Atlanta

## **Skills**

Languages: Python, Scala, Bash, SQL, JS/CSS/HTML

Tools: Git, Terraform, AWS(EC2, Airflow 'MWAA', Glue, Step Functions, Lambda, RDS), JIRA, CI/CD, Github Actions

Frameworks: Django, FastAPI, Apache Spark, React

## **Experience**

**Elation Health**, Remote

*October 2018-Present*

*Senior Software Engineer*

*October 2021-Present*

- Implemented scalable ETL pipelines, data workflow, and data models, automating 22 manual tasks Resulted in the import of millions of patient documents for our customers
- Laid the groundwork for an entirely new revenue stream by automating the ingestion of patient data from CSV files placed by customers into an S3 bucket
- Debugged and resolved application issues to improve user experience, including JS/React frontend work and Python/Django backend work
- Built cross-functional relationships with customer teams to form a deep understanding of project and product requirements
- Mentored and coached junior team members, sharing technical knowledge and best practices to enhance their skills and foster professional growth

Languages: Python, FastAPI, JavaScript (React)

Tools: Airflow, S3, DynamoDB, Lambda, SQS

Frameworks: Django

*Data Engineering Lead*

*May 2020-October 2021*

- Helped create, manage, and monitor the hosted database product
- Led release cycles, including communication, documentation, and updates
- Terraformed existing code, building CI/CD pipelines leveraging Github Actions
- Supported customers in connecting, integrating, and writing MySQL queries for their data

Languages: Scala

Tools: Glue, Step Functions, Apache Spark, Terraform

*Integrations Engineer*

*October 2018-May 2020*

- Created bi-directional interface that would call sFTP server and process files, ingesting data in Django app
- Communicated with external vendors and customers helping to navigate and integrate with Elation's RESTful API
- Assumed the role of Scrum Master and Product Owner, working with an internal and outsourced team to create an MVP on assessing patients conditions and providing recommendations for treatment or care

**CulturaLink, LLC**, Hybrid Atlanta, GA

*Implementation Engineer*

*June 2018-October 2018*

- Documented existing deployment procedures, a run book for releasing updates to app
- Wrote user and regression tests for Swift app and automated them in Atlassian's Pipelines
- Distributed iOS devices with pre-installed video application for customers at 31 hospitals in Texas
